Who offers best chance for change?

The question of who offers the best chance for change is a complex one. It is not simply a matter of who is the most powerful or who has the most resources. It is a question of who is the most willing to listen, to learn, and to change. It is a question of who is the most open to the possibility of being wrong and of being corrected. It is a question of who is the most committed to the idea of a better world for all of us.

We are all looking for someone to lead us out of the darkness and into the light. We are all looking for someone who can show us the way to a better future.

Priests work for revival of Bicol's 'Pasyon'

Reporters by B. Bando

The Bicol region is home to a rich cultural heritage, and one of the most important aspects of this heritage is the 'Pasyon' or Passion Play. For many years, priests have been working to revive this tradition, which has been largely forgotten. They have organized workshops and seminars to teach the young about the importance of the Pasyon, and have also staged performances to attract a wider audience.

Napocor sales down by 1% in '03

By Joseph L. Tan

MANILA, July 1 (PNA) — Napocor sales for the first half of 2003 decreased by 1.1% compared to the same period last year, according to the company's financial report.

The report shows that Napocor's sales for the first half of 2003 were P1,000.5 billion, or 99.5% of the P1,001.5 billion recorded for the same period last year.

The decrease in sales was primarily due to a decline in the volume of electricity sold, which was 1.1% lower than last year's volume.

However, the average selling price per kilowatt-hour (kWh) increased by 0.5% compared to last year's average.
